WITH ENGLAND

A Suggestion Made by the British Government.

WILL HELP AGAINST SPAIN,

If We Will Give Britain Moral Support In China.

OUREN PRAISES THE PRESIDENT.

Expresses Gratification at His Course In the Spanish Affair and Sympathy With our Efforts to Relieve Suffering Humanity In Cuba-Hopes That War Will Be Avoided -- Pointed Out That the commercial Relations of the United States and Great Britain Would Be Jeopardized-Would Cut Off England's yood Supplies From This Country. President Replied That He Hoped War Would Be Averted.

WASHINGTON, March 10 .- Much conjecture has been indulged in touching the visit paid to the White House by the British ambassador. The Washington Post says this morning on this

Queen Victoria has, through Sir Julian Panncefote, conveyed to President McKinley her gratification at the wise and conservative course which he has thus far pursued in relation to the Cuban and Spanish situation. She also expressed sincere sympathy with the efforts put forth by the United States to relieve suffering humanity in Cuba, with the hope that these endeavors may be conducted to a successful conclusion without war.

The desire of the queen that war should be avoided was emphasized for several reasons. It was pointed out that the commercial relations of Great Britain with the United States were too extensive to be jeopardized by a war between this country and Spain. The blockade of the port of New York, for instance, it was pointed out, would be of irreparable damage to British shipation of the ship oing, while the ce ment of food supplies to England would be exceedingly serious.

The reply of the president expressed his pleasure at the utterance of the queen, with the additional statement that he also hoped that war would be averted.

The attitude of Great Britain goes further in this matter than a mere expression of good wishes. There is a desire, which has yet only reached the stage of tentative suggestion, that ar alliance may be formed between Great Britain and the United States, as we have identical interests in the great question of finding in China and the east a market for manufactures. This suggestion has considerable weight with the administration. Great Britain is finding her supremacy in China seri ously threatened. France has already established herself on the south and Russia is aggressive on the north, while Germany has secured a strong foothold. If England proposes to hold her own she must fight for it.

It was the suggestion that if the United States would afford to Great Britain her moral support in case of trouble in the east, she would offer us her sympathy and practical aid in any trouble that threatened with Spain that resulted in a discussion of the eastern question in the cabinet meeting last Tuesday. The administration appre ciates the value of this friendly attitude. Although it is well understood in this country that it will be impossible for the navy to be placed at the disposal of Great Britain in upholding British supremacy in the east, there are many ways in which our influence could be exerted with effect in British behalf.

GUNS FOR MANY MEN.

American Rifles to Be Bought to Arm 500,000 Volunteers.

Washington, March 10 .- The war department is arranging to secure a large supply of modern rifles, sufficient in time of emergency to arm a force of 500,000 men. The need of these modern guns has long been apparent, but congress has not shown any disposition to supply any reserve of rifles for use by a volunteer force in time of emergency. Now, however, an adequate supply of the most effective rifles will be among the first uses to which the war department will put its share of the defense fund. It is not unlikely that the demand will require the army to turn from the Krag-Jorgensens rifle, now in use, and adopt in part at least one of the Ameri-

can made guns. General Miles strongly favors the "straight pull gun." It is of American make, and has been adopted by the British government as the standard

arm, 1,600,000 being now in the hands of British soldiers. General Miles recommended its adoption 18 years ago, when a member of a board for the choice of a rifle. He continued his advocacy of it, and in view of his ranking position in the army, his view will have much weight. This gun is used by the United States navy, and this is being used as another point in its favor, as the

reserve supply would be available for either branch of the government service.

Like attention is being given to supplies of powder, cartridges, etc., for the army. Those in authority say orders can be filled without delay, and that about the only branch of ordnance on which the facilities are not fully up to which the facilities are not fully up to an emergency demand are those for heavy fortification guns.

Not Bought by Spain.

WASHINGTON, March 10 .- The administration has definite information from a source which is regarded as beyond question to the effect that Spain has not purchased the two Brazilian cruisers Barboso and Amazonas.

DISCIPLINE ON MONTGOMERY.

Persons Not Allowed to Board Her at Will-Court of Inquiry.

HAVANA, March 10.-The arrival here of the Montgomery was very quiet, it being generally understood that she comes to replace the coast survey steamer Fern as quarters for Captain Sigsbee and others.

Commander Converse of the Montgomery is a high authority on explosives, and his advice will be useful to the court of inquiry into the loss of the Maine.

After firing the usual salute and being saluted in return, the Montgomery was moored in the principal harbor, near the wreck of the Maine and in the centre of a circle of Spanish ships.

Later, Commander Converse received the correspondents on board the cruiser, though he had nothing to tell beyond the facts already sent.

Captain Sigsbee, Lieutenant Commander Wainwright and Ensign Powelson will occupy quarters on the Mont-gomery, the Fern leaving Havana this afternoon. The Montgomery is as trim and neat as possible. Nobody is allowed on board without permission, but no-body is excluded if business or courtesy demands the admission of the visitor. There is no indication of the length of the cruiser's stay in the harbor.

The court of inquiry held its usual

Spanish divers worked on the wreck for a time.

CRIMINAL ECONOMY.

General Greeley Shows the Need of an Appropriation For Electrical Communication Between Forts In Harbors-Refused by Different Congresses.

WASHINGTON, March 10. - General Greely, chief signal officer, has written a letter to the secretary of war, who has forwarded it to Chairman Cannon of the house committee on appropriations, in which he says:

"The estimate of \$20,000 for cables to connect electrically the fortifications in the harbors of New York, Boston and Philadelphia has been omitted in the sundry civil bill, as reported by the house of representatives. The chief signal officer would be derelict in his duty did he not call the attention of the honorable, the secretary of war, to the necessity of urging upon the senate such an appropriation. For seven consecutive years the chief signal officer has unavailingly recommended the importance of this matter, recting that some of our most important defenses can only be reached by messenger.

The destruction of the military cables between Alcatraz, Angel Islands and the mainland long since left the fortifications in San Francisco harbor isolated and entirely unconnected electrically, and Fort Warren in Boston harbor is also without reach by telephone or tele-

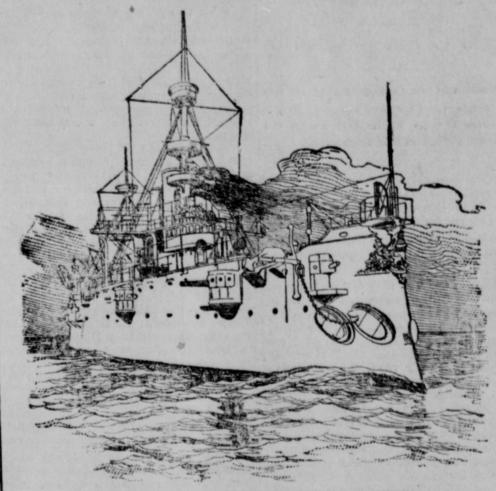

"in New York harbor it is true that several posts can communicate with each other over circuitous commercial routes, but such complicated methods, inadequate in peace even, would inevitably break down in case of actual hos-

tilities. "It must seem hardly creditable to either business men or experts that congress after authorizing a system of coast defenses, to cost millions of dollars, should for years refuse to connect the military forts around the great cities of New York, Boston and San Francisco either electrically or telephonically. In critical emergencies, such as arise in all defenses, military operations at these points would, under existing conditions, be necessarily conducted without concert or union, thus needlessly jeopardizing lives by the thousands and property to the value of hundreds of millions of dollars."

SHOULD BE MODIFIED.

Senate Committee Thinks Civil Service Covers Too Many Offices.

WASHINGTON, March 10.-Senator Pritchard, chairman of the committee on civil service, has presented a report of that committee on the recent investigation of the classified service, in which

ARMORED CRUISER NEW YORK

The New York is smaller but faster than the Brooklyn. Her speed is 21 She carries six 8 knots, her displacement 8,200 tons, and she cost \$3,000,000. inch and twelve 4 inch guns and 16 guns of smaller caliber.

rules, and should restore to the heads of departments and heads of bureaus the appointment of certain classes of

Among the offices which the committee recommend should be excluded from the classified service are: Deputy commissioner and deputy collectors of internal revenue; agents who are employed by the commissioner of internal revenue; temporary storekeepers, gaugers and others.

The House Session.

WASHINGTON, March 10 .- The house devoted itself to routine business. The legislative, executive and judicial appropriation bill went through its last stages in the adoption of the final conference report, and the remainder of the day was consumed in the consideration of the senate amendments to the Indian appropriation bill.

Four Mohammedans Killed In a Riot Against Christians.

BOMBAY, March 10 .- Serious rioting has occurred here. The trouble arose through a plague party inquiring into the cause of the sickness of a Mohammedan woman. An enormous crowd of Castemen gathered and stoned and mobbed the party, which retired for an escort of armed police and then returned and redemanded the surrender of the patient, which was refused. The police charged, and four Mohammedans were killed

and several were wounded. The outbreak was specially directed against Christians. It is reported that two European soldiers were nearly

SPANISH REPORTS OF VICTORIES.

In One Battle They Say Over 100 Insurgents Were Killed.

HAVANA, March 10 .- A Spanish column under Colonel Tejeda, according to a Spanish report, has captured several intrenched insurgent camps in the Manzanillo district, including the camp of El Chine. The troops, the Spaniards add, killed nine men, made three prisoners and captured "an armory with many tools, and destroyed many great huts and hospitals."

Colonel Tejeda's column, it is further announced, will continue pursuing the insurgents, who are said to be in retreat. There was another engagement between these opposing forces, it appears, at La Sierra, and the insurgents are alleged to have lost over 100 men, while the Spanish colonel reports only two men killed and 15 wounded.

AUTONOMY A SUCCESS.

Home Rule Scheme of Spain Works In Porto Rico.

WASHINGTON, March 10 .- Official reports indicate that the autonomy scheme projected for Porto Rico has been put into successful operation. This is interesting mainly because of resemblance between the project and the plan which it is now sought to put in play in Cuba. The news came in the shape of reports given out at the state department received from United States consuls.

Proctor Leaves Havana.

HAVANA, March 10.—Senator Proctor has left here for Key West, and will go to Miami by steamer.

No River and Harbor Bill. WASHINGTON, March 10.-The house

committee on harbors and rivers has voted to not report a river and harbor appropriation bill at this session. The Machias at Norfolk. WASHINGTON, March 10.-The arrival

of the gunboat Machias at Norfolk, Va., has been reported, having been or-"The committee is of the opinion that the president should make certain modifications in the existing civil service to be void of significance."

PATRIOTIC SENATORS.

They Unanimously Passed the Bill Grant ing the President \$50,000,000 For De fense, Without Debate-The Measure Went Through In 12 Minutes.

WASHINGTON, March 10 .- Presiden McKinley's hands have been upheld by both branches of the American congress. With enthusiasm, fervor and promptness almost unparalleled in the senate in time of peace that body passed the emergency appropriation bill, carrying \$183,000 of deficiencies, and placing at the disposal of the president \$50,000, 000 for national defense. The vote by whice the measure was passed was unanimous. Seventy-six short, sharp and empatic speeches were delivered in favor of the bill, each one being simply a ringing "aye" during the rollcall upon the passage of the measure.

Not only did every senator present register his vote in favor of the bill, but for every absent member the authorita tive announcement was made that if he were present he would vote aye. From the time the bill wa senate by Mr. Hale (Maine) until it was passed not an inharmonius note was sounded. Party lines were swept aside. In the general outburst of patriotic feeling pairs were broken, every senator being anxious to register his vote on

When Mr. Hale reported the bill to the senate he asked that it be placed on its passage. The members of the committee on appropriations had previously effected an arrangement whereby there would be no debate on the bill, and after it was read, Vice President Hobart placed it immediately on its passage.

Twelve minutes after the bill was re ported to the senate the vice president announced its unanimous passage. The great work was accomplished so quickly that most of the people who crowded the galleries scarcely realized that the meas ure, so far as congress was concerned, had become a law. Some of the spectators fully grasped the meaning of the senate's action, and when the announce ment of the vote was made a murmur of applause ran through the galleries.

The members of the senate, however, maintained a dignified silence, the realization among all of them being keen that a situation which warranted the passage of so unusual a measure was too grave to prevent an outburst of applause. Earnestness and determination were evinced on both sides of the chamber, but there was not a note of levity that would detract from the seriousness of the work performed.

BRYAN VERY MUCH PLEASED.

Might Have Been Better to Appropriate a Hundred Million Instead of Fifty.

ATLANTA, March 10 .- William J. Bryan spent a few hours in Atlanta on his way to Macon, where he spoke last night. When asked his opinion as regards the action of congress in placing \$50,000,000 at the president's disposition for the national defense, Mr. Bryan

"I am glad the public acted promptly and unanimously. In fact it might have been better to have made it \$100, 000,000, to show the world that congress and the American people, without regard to political differences, are ready to support the administration in any action necessary for the protection of the honor and welfare of the nation." He complimented Consul General

Oil City Opera House Burned.

OIL CITY, Pa., March 10 .- The Oil City Opera House was destroyed by fire at an early hour this morning. Loss on building \$60,000. The Wilson Theater company, which was playing a week's stand here, lost all wardrobes and scenery; loss \$5,000. Opera house only partly covered by insurance. Audience all out when fire started.

DEFENSE FUND READY.

Much of It Designed to Buy New Ships.

INQUIRIES BEING MADE ABROAD.

Naval Attaches and Diplomatic Officers Questioned by Secretary Long-Brownson Sets Sail-Armor Not Available For Battleships Being Built-Bill Signed.

WASHINGTON, March 10 .- While the matter has been considered, it can be stated that the \$50,000,000 defense fund has not yet been allotted among the various branches of the government service. Each of these had prepared roughly and tentatively an estimate of the funds it could dispose of to advantage, but upon looking over the ground, the president concluded that it would be well, perhaps, to avoid making the allotment until the necessity became apparent. The reason back of this is that the sum that can be profitably spent for warships cannot even be guessed at with any approximation to accuracy just now.

The president has signed the defense bill, which passed the senate unanimonsly.

As the ships are to be first choice in the steps for defense, until their cost is ascertained it is not possible to diivde the remainder of the appropriation among the other branches of the military and naval services.

The secretary of the navy is making every effort to secure from our naval attaches and diplomatic officers abroad all information obtainable respecting the number of ships building, their price and other data. This does not necessarily interfere with the execution of the plans confided to Captain Brownson, who has sailed for Southampton, but rather promises to assist him materially in making speed with his inquiries. Up to this moment not only has the United States government bought no warships, but it has not even secured an option on one. There are many applications coming to the department from persons and firms who desire to sell ships to the government, but in most of these cases either the craft offered is not suitable for naval needs or the date of possible completion is so distant, from three months upward, that it cannot be regarded as worthy of purchase to meet an emergency. There is less difficulty experienced in securing tenders of war material, such as shot and shell and powder, and the navy department has almost assured itself of an abundant supply of certain kinds of smokeless powder

abroad at short notice. The officials of the department are in daily correspondence by mail and telegraph with agents of ammunition houses, and besides are now fully acquainted with the plans of domestic powder makers for enlarging their plants to meet an emergency. The rep-resentatives of the armor making firms are in consultation with the department steadily, generally relative to the supply of gun forgings and such material for use in the gunshops here and at Watervliet, but the question of armor is receiving little attention, as the armor makers report that they cannot undertake by any known agency to turn out such armor as would be required for a modern battleship in less than seven months, for the reason that tempering and face hardening cannot be hastened without destroying the value of the

Thus it has been demonstrated to the navy department that it will not be possible to make the armor for the superb battleships, three in number, now building at Newport News and at Cramp's and at the Union Iron works of San Francisco, in time to render these ships, far better it is claimed than any offered from abroad for sale, available for any emergency that may arise this

Senor Mendonca, the Brazilian min-ister, said that he had received no information as to the reported negotiations toward the purchase of Brazilian warships, now in course of construction in foreign yards. In other official quarters the impression is growing that there is better prospects of securing ships now building for Argentina and Chile. Brazil has been active of late in building up her navy, and there is doubt as to her willingness to part with any of the ships now building for her.

CATHOLICS READY TO FIGHT.

Ten Thousand Could Go to the Front With Twenty-Four Hours' Notice.

SPRINGFIELD, Ill., March 10 .- Major General Lee J. Kadeski, commanderin-chief of the Uniform Rank, Catholic Knights of America, stated to an Associated Press representative that of the 25,000 members of the organization, all drilled men, 10,000 could be put in the field within 24 hours in case of war.

Wanamaker Consents to Run.

PHILADELPHIA, March 10. - John Wanamaker has consented to be the candidate of the Business Men's Republican league for governor. He defines his position in a letter of about 700

Up to this moment not only has the United States government bought no warships, but it has not even secured an option on one. There are many applications coming to the department from persons and firms who desire to sell ships to the government, but in most of these cases either the craft offered is not suitable for naval needs or the date of possible completion is so distant, from three months upward, that it cannot be regarded as worthy of purchase to meet an emergency. There is less difficulty experienced in securing tenders of war material, such as shot and shell and powder, and the navy department has almost assured itself of an abundant supply of certain kinds of smokeless powder abroad at short notice.

The officials of the department are in daily correspondence by mail and telegraph with agents of ammunition houses, and besides are now fully acquainted with the plans of domestic powder makers for enlarging their plants to meet an emergency. The rep-resentatives of the armor making firms are in consultation with the depart-ment steadily, generally relative to the supply of gun forgings and such material for use in the gunshops here and at Watervliet, but the question of armor is receiving little attention, as the armor makers report that they cannot undertake by any known agency to turn out such armor as would be required for a modern battleship in less than seven months, for the reason that tempering and face hardening cannot be hastened without destroying the value of the

Thus it has been demonstrated to the navy department that it will not be possible to make the armor for the superb battleships, three in number, now building at Newport News and at Cramp's and at the Union Iron works of San Francisco, in time to render these ships, far better it is claimed than any offered from abroad for sale, available for any emergency that may arise this

Senor Mendonca, the Brazilian minister, said that he had received no information as to the reported negotiations toward the purchase of Brazilian warships, now in course of construction in foreign yards. In other official quarters the impression is growing that there is better prospects of securing ships now building for Argentina and Chile. Brazil has been active of late in building up her navy, and there is doubt as to her willingness to part with any of the ships now building for her.

CATHOLICS READY TO FIGHT.

Ten Thousand Could Go to the Front With Twenty-Four Hours' Notice.

SPRINGFIELD, Ill., March 10.-Major General Lee J. Kadeski, commanderin-chief of the Uniform Rank, Catholic Knights of America, stated to an Associated Press representative that of the 25,000 members of the organization, all drilled men, 10,000 could be put in the field within 24 hours in case of war.

Wanamaker Consents to Run.

PHILADELPHIA, March 10. - John Wanamaker has consented to be the candidate of the Business Men's Republican league for governor. He defines his position in a letter of about 700 words.

DAILY MAIL TO LISBON

Cross Country Route Now Being Considered.

NEW POSTOFFICE AT MADISON

Hon, R. W. Tayler Has Not Only Supported the Plan, but Has Recommended the Matter to the Postmaster General-Has Many Country Friends.

A petition is being circulated in the city today asking for the establishing of a daily mail route between here and Lisbon, and the locating of a postoffice in Madison township.

The plan was originated several years ago, but Dr. G. P. Ikirt refused to support the measure while he was in congress and the matter was dropped, but the parties have received assurance from Hon. R. W. Tayler that he will support the petition and has already recommended it to the postmaster general.

It is proposed to carry the mail across the country, the mail carrier leaving here in the morning and returning in the evening, thus giving the city a daily mail service between here and the county seat, and also furnishing the residents of Madison township with another office. The petition has been signed by at least 300 people in the country districts and Lisbon, and is being very numerously signed in the city by parties who realize a daily service to the county seat would be a great convenience.

The petition also asks for the appointment of Mrs. E. Ellen Saint as postmistress for the new office.

COULD GET WHISKY

People Would Not Give Him

Yesterday afternoon a well dressed man applied to Chief Johnson for admission to the city jail, claiming he wanted to rest and had no money. The chief gave him a cell and notified Trustee Lloyd.

The trustee questioned the man, and he said he came from Washington, D. C., and was a cook by trade, but could secure no work and was very much discouraged. He acknowledged he had been drinking, but said people would give him that when he couldn't get anything to eat.

The man was fed and sent to Rochester on the 4:20 train. He thinks he can get work at that place.

WILL HIRE A HALL

Mormons Are Preparing For a Big Campaign.

The Mormons in this city will rent a hall in the near future and hold meetings not less than three times a week.

One of the number said last night they expected one of the traveling elders here within the next week, and a series of meetings would be conducted in the hall if it could be secured by that time.

Following the visit of the elder it is the intention to hold a series of meetings for the purpose of securing converts to their faith, if such is possible.

AN ANTI-TRUST ACT.

One Recommended by the Valentine Committee.

REPORT ON OHIO COMBINATIONS.

A Resolution Sustaining President Mc-Kinley's Cuban Policy Adopted In the House-Bicycle Theft Bill Passes the Senate-Work of the Legislature.

Columbus, March 10 .- The Valentine senate legislative committee, appointed to investigate trusts in Ohio, has reduced its findings to writing. Mr. Valentine believes this written statement will represent the views of a majority of the committee. The report says prices of coal between trust and competitive points range from 25 to 40 cents per ton; illuminating oil, from 41/2 to 8 cents; insurance, 25 to 60 per cent, as compared with competition in New York, and as between Ohio cities as much as 13 1-3 per cent, where combinations exist.

As to freight rates, similar findings are alleged. The report will recommend that section 3375, revised statutes of Ohio, be amended to equalize freight rates and that the commissioner of railroads and telegraph be given power, at tne expense of the state and railway corporations, to equalize freight by legal process. Pooling in insurance is made a subject for farther legislative action, and a general anti-trust act is recommended.

These bills passed in the house: Senate bill, by Mr. Broerein, amending the Workman school law so as to provide for the election of two subdirectors.

Senate bill by Mr. Riley, ceding to the United States certain land situated These bills were introduced in the

The Weather.

Partly cloudy, possibly with showers near the lake; fresh southerly winds.

DOUBLE CRIME OF A BOY.

Killed a Chum Over a Girl and Then Committed Suicide.

LANCASTER, Pa., March 10 .- William B. Davis, of St. Clair, Pa., has been shot and probably fatally wounded at Millersville by Roy Gehrig, of Milton, Pa. Gehrig then committed snicide. Both were about 19 years of age and were classmates in Pierce's business college in Philadelphia. They came to Millersville to call upon two girl students at the Normal school there.

The following note left by Gehrig gives his explanation of the affair. He

"We are dead in love with Alice Cummings and Annie Holmes, and, not being able to see them, and they keeping away from us, we resolved to take our lives. My name is Roy Gehrig, of Milton, Pa., and the little fellow is William Davis of St Clair. Please notify our parents at once. We would like to be cremated, so notify our parents at once."

Davis says he knows nothing of the note, and denies there was any compact to commit suicide. The Miss Cummings mentioned in the note comes from this city, and Miss Holmes is from St. Clair. Gehrig was introduced to the young ladies by Davis.

The boys stopped at Hoak's hotel,

where the shooting occurred.
PHILADELPHIA, March 10.—It was stated at Pierce's college that Gehrig left the school on Monday, after being rebuked for absence last week. Gehrig's father is a brewer at Milton and Davis' father is a coal operator at St. Clair. Nothing is known here of the girls mentioned in Gehrig's note.

AN ANCIENT CHURCH.

A Beverly (Mass.) Structure Nearly Two Centuries Old.

The remodeled Second church, that of the Congregational society, at North Beverly, Mass., is 184 years old and is the first and only house of worship the society has ever had. The Second parish of Beverly is one of the old societies of the county. When incorporated by the general court in 1713, it was as the "precinct of Salem and Beverly." Objection has been made on the part of certain Beverly people to the separation of the parish.

The first meeting toward forming the society was held in November, 1713, and a committee appointed. At a later meeting the sum of £350 was raised toward building a meeting house. The house was built and finished and dedicated the following year.

Originally it was 50 feet by 40. In 1771 a porch was added to the front end by Caleb Dodge at his own expense. In 1751 a steeple was built and a 400 pound bell was purchased. Two years later Robert Hooper gave a bell to the church. The house was placed on its present site in 1837, when it was en larged and thoroughly remodeled.

When General Gage was stationed at Danvers and lived in the Collins house, at the time he sent his messenger down to Salem to terminate the sitting of the assembly because it was about to form a provincial congress, he attended church in the North Beverly house of worship.

For many years the ceiling was not plastered, but later some of the wealthy members had the spaces over their own pews plastered at their own expense. When Robert Hooper gave the church the bell, he was given a pew in the church, and the parish voted to have it plastered overhead at the expense of the society. - Boston Herald.

WON'T SELL HIM TRASH.

Commander Brownson Talked of His Mission to Look After Ships.

NEW YORK, March 10.-Commander W. H. Brownson, U. S. N., before sailing for Southampton on the American line steamer St. Paul, said: "My mission is to prepare for the exigencies of the situation and to see what can be had and what can be done in case of war, the possibilities of which I think are very remote."

The commander's attention was called to the published statements that foreign shipbuilders are trying to sell their poorer stock to the United States. "You may rest assured," said he, "that they won't sell me any trash.'

MAINE REPORT NEXT WEEK.

Court of Inquiry Decision Expected by Navy Department.

Washington, March 10 .- The statement has been made at the navy department that the report of the Maine court of inquiry probably will come to the department some time next week.

SWIFT SPANISH VESSELS.

Four New Torpedoboat Destroyers Finished In Scotland.

GLASGOW, March 10 .- The Spanish torpedoboat destroyers Osado and Audaz have left the Clyde bank, fully manned and with all their guns and other armaments on board. They will embark their ammunition today at Greenock and will sail on Saturday. At their trials they developed a speed of 30 knots.

Men Wanted For Navy.

WASHINGTON, March 10 .- Admiral Sicard has been authorized to enlist suitable men for the navy at Key West, if he can find the material. He reported that he had received some applications from machinists and seamen, and was immediately given power to take the men. The department is still striving vigorously to secure machinists, especially men who know how to run stationary engines. These men can be quickly taught how to run marine engines and require little other training to make them valuable aboard ship.

WHEN YOU ARE OLD.

When you are old and gray and full of sleep
And nodding by the fire, take down this book
And slowly read and dream of the fair look Your eyes had once and of their shadows deep.

How many loved your moments of glad grace And loved your beauty with love false or

But one man loved the pilgrim soul in you And loved the sorrows of your changing face

And, bending down beside the glowing bars, Murmured a little sad, "From us fled love. He paced upon the mountains far above And hid his face amid a crowd of stars.

-"Poems," by W. B. Yeats.

FIRE HORSES.

The Quickest Ones In the World Are Said to Be In Kansas City.

F. S. Dellenbaugh writes of "The Quick Horse' in St. Nicholas, his article telling of the training of horses for the fire department. Mr. Dellenbaugh says:

The quickest horses in the world were at one time in Kansas City at the headquarters of its fire department, directly under the office of the chief, Mr. George C Hale. To Mr. Hale's genius more than to any other factor the quick horse owed his first development, for Mr. Hale is the inventor of the earliest swinging harness which made the quick horse possible. When Mr. Henry M. Stanley and his wife were in this country, they witnessed an exhibition drill of the Kansas City fire department. The drill so impressed the visitors that an account of it was published in a London journal, and this English article brought an invitation to Mr. Hale to visit England as the representative of the American fire service at the international fire tournament. Mr. Hale and a picked corps went to England, taking with them the remarkably quick horses Joe and Dan, and they became world famous. As the quickest harnessing time of the London fire brigade is 1 minute 171/2 seconds and the Kansas City horses were harnessed in 13/4 seconds and were out of the engine house in less than 8 seconds, there could be no competition. In Kansas City four fine bays were harnessed to the hook and ladder truck almost as quickly as even Joe and Dan could jump into their harnesses. It was a pretty sight to see these four well kept horses spring to their places at the stroke of the gong and in two or three seconds stand ready to run with the apparatus. Joe was killed by an accident, but Dan, with a new mate, is still in service, and as quick as ever.

The record for quickest time from the engine house to the throwing of water three months. It affected my entire syson the fire is held by a Kansas City company. In this instance the horses were harnessed, a run of 2,194 feet (a suffered almost constantly with a dull little less than half a mile) was made, and water thrown from the hose in the wonderfully brief time of 1 minute 31 1/2

Schopenhauer on Women.

Schopenhauer's mother, Joanna, was a singular woman, with whom he was perpetually at war. She was lively, he was grim. She was a sentimentalist, he detested sentiment. She was devoted to society, to gossip, to the convenances of life. He lived for ideas, and with an almost savage moroseness poured scorn on the round of "at homes" and æsthetic tea parties. Both were selfish and quarrelsome. We may judge, therefore, that Schopenhauer took his notions of women partly from his mother. It goes without saying that these notions were violent in the extreme, yet not without some aspects of truth.

The new woman would rave at this satire on her pretensions, and yet it would do her good to read what Schopenhauer has to say with as much calmness as she can command. Woman is here depicted as emphatically "a lesser man"-indeed so far below man as to be fit only for the role of the old fashioned German hausfrau. - Self Culture.

Time to Stop.

Among the best stories recorded by a well known angler is one about a Scottish laird who was one day relating to his friends at the dinner table the story of a fine fish he bad caught. "Donald," said he to the servant behind his chair -an old man, but a new servant-"how heavy was the fish I took yesterday?"

Donald neither spoke nor moved. The ta laird repeated the question. "Weel," replied Donald, "it was twal' pund at breakfast, it had gotten to achteen at dinner time and it was sax and twenty when ye sat down to supper wi' the captain." Then, after a pause, he added, "I've been tellin lees a' my life to please the shooters, but I'll be dashed if I'm going to tell lees noo in my old age to please the fushers."

The Left Wing.

"Is there any portion of the fowl you prefer, major?" asked the hostess bland-

"The left wing, if you please."

"The left wing?"

"Yes," retorted the major, gazing dubiously at the platter. "I believe it is always good military tactics to bring the left wing of a veteran corps into action."-London Fun.

A man may float in salt water without moving his hands or feet if he has the presence of mind to throw his head back and allow his body to sink to the position which it will then naturally

A Turkish turban of the largest size contains 20 yards of the finest and softest muslin.

The story is told of a young married woman, who asked another young married woman how she managed to get along so amicably with her husband. The answer was, "I feed the brute—his stomach wim food and his mind with flattery." Even a man will have to admit that this young we. man had solved about two-thirds of the art of making the average man happy. The other third consists of keeping his body as such condition that he will enjoy his food and his mind in such condition that he will be susceptible to flattery. It isn't much use to put tempting food before a man whe hasn't an appetite. It doesn't pay to lavish smiles on a man whose nerves are racked and overworked.

The average man pays very little attention to his health, and won't take medicine of his own accord until he is flat on his back A shrewd wife will keep an eye on her has. band's welfare in this respect, and when she sees that he is bilious or suffering from indigestion, or is generally out of sorts, will see that he resorts to that most wonderful all invigorators, Dr. Pierce's Golden Medical Discovery. It is the best of all appetite - sharpeners, blood - makers and flesh-builders. It corrects all disorders of the digestion and makes the liver active and the blood pure. It tones the nerves and cures all cases of nervous exhaustion and prostration. It cures 98 per cent. of a cases of consumption, bronchial, throat and kindred ailments. Medicine dealers sell it. Mrs. Rebecca F. Gardner, of Grafton, York Co. Va., writes: "I was so sick with dyspepsia that I could not eat anything for over four months. I thought I was going to die. I weighed only to pounds. I took two bottles of the 'Golden Med. pounds. I took two bottles of the 'Golden Med-ical Discovery.' I am now as well as ever and weigh 125 pounds."

For constipation - Dr. Pierce's Pelles

Killed a Chum Over a Girl and Then Committed Suicide.

LANCASTER, Pa., March 10 .- William B. Davis, of St. Clair, Pa., has been shot and probably fatally wounded at Millersville by Roy Gehrig, of Milton, Pa. Gehrig then committed suicide. Both were about 19 years of age and were classmates in Pierce's business college in Philadelphia. They came to Millersville to call upon two girl students at the Normal school there.

The following note left by Gehrig gives his explanation of the affair. He wrote:

"We are dead in love with Alice Cummings and Annie Holmes, and, not being able to see them, and they keeping away from us, we resolved to take our lives. My name is Roy Gehrig, of Milton, Pa., and the little fellow is William Davis of St Clair. Please notify our parents at once. We would like to be cremated, so notify our parents at once."

Davis says he knows nothing of the note, and denies there was any compact to commit suicide. The Miss Cummings mentioned in the note comes from this city, and Miss Holmes is from St. Clair. Gehrig was introduced to

the young ladies by Davis. The boys stopped at Hoak's hotel,

where the shooting occurred. PHILADELPHIA, March 10.-It was stated at Pierce's college that Gehrig left the school on Monday, after being rebuked for absence last week. Gehrig's father is a brewer at Milton and Davis' father is a coal operator at St. Clair. Nothing is known here of the girls mentioned in Gehrig's note.

AN ANCIENT CHURCH.

A Beverly (Mass.) Structure Nearly Two Centuries Old.

The remodeled Second church, that of the Congregational society, at North Beverly, Mass., is 184 years old and is the first and only house of worship the society has ever had. The Second parish of Beverly is one of the old societies of the county. When incorporated by the general court in 1713, it was as the precinct of Salem and Beverly." Objection has been made on the part of certain Beverly people to the separation of the parish.

The first meeting toward forming the society was held in November, 1713, and a committee appointed. At a later meeting the sum of £350 was raised toward building a meeting house. The house was built and finished and dedicated the following year.

Originally it was 50 feet by 40. In 1771 a porch was added to the front end by Caleb Dodge at his own expense. In 1751 a steeple was built and a 400 pound bell was purchased. Two years later Robert Hooper gave a bell to the church. The house was placed on its present site in 1837, when it was en larged and thoroughly remodeled.

When General Gage was stationed at Danvers and lived in the Collins house, at the time he sent his messenger down to Salem to terminate the sitting of the assembly because it was about to form a provincial congress, he attended church in the North Beverly house of worship.

For many years the ceiling was not plastered, but later some of the wealthy members had the spaces over their own pews plastered at their own expense. When Robert Hooper gave the church the bell, be was given a pew in the church, and the parish voted to have it plastered overhead at the expense of the society. - Boston Herald.

WON'T SELL HIM TRASH.

Commander Brownson Talked of His Mission to Look After Ships.

NEW YORK, March 10.-Commander W. H. Brownson, U. S. N., before sailing for Southampton on the American line steamer St. Paul, said: "My mission is to prepare for the exigencies of man"-indeed so far below man as to the situation and to see what can be be fit only for the role of the old fashhad and what can be done in case of war, the possibilities of which I think are very remote."

The commander's attention was called to the published statements that foreign shipbuilders are trying to sell their poorer stock to the United States. "You may rest assured," said he, "that they won't sell me any trash."

MAINE REPORT NEXT WEEK.

Court of Inquiry Decision Expected by Navy Department.

WASHINGTON, March 10 .- The statement has been made at the navy department that the report of the Maine court of inquiry probably will come to the department some time next week.

SWIFT SPANISH VESSELS.

Four New Torpedoboat Destroyers Finished In Scotland.

GLASGOW, March 10 .- The Spanish torpedoboat destroyers Osado and Andaz have left the Clyde bank, fully manned and with all their guns and other armaments on board. They will embark their ammunition today at Greenock and will sail on Saturday. At their trials they developed a speed of 30 knots.

Men Wanted For Navy.

WASHINGTON, March 10 .- Admiral Sicard has been authorized to enlist suitable men for the navy at Key West, if he can find the material. He reported that he had received some applications from machinists and seamen. and was immediately given power to take the men. The department is still striving vigorously to secure machinists. especially men who know how to run stationary engines. These men can be quickly taught how to run marine engines and require little other training to make them valuable aboard ship.

WHEN YOU ARE OLD.

When you are old and gray and full of sleep And nodding by the fire, take down this book And slowly read and dream of the fair look Your eyes had once and of their shadows deep.

How many loved your moments of glad grace
And loved your beauty with love false or

But one man loved the pilgrim soul in you And loved the sorrows of your changing face

And, bending down beside the glowing bars, Murmured a little sad, "From us fled love." He paced upon the mountains far above And hid his face amid a crowd of stars.

-"Poems," by W. B. Yeats.

FIRE HORSES.

The Quickest Ones In the World Are Said to Be In Kansas City.

F. S. Dellenbaugh writes of "The Quick Horse" in St. Nicholas, his article telling of the training of horses for the fire department. Mr. Dellen-

The quickest horses in the world were at one time in Kansas City at the headquarters of its fire department, directly under the office of the chief, Mr. George C Hale. To Mr. Hale's genius more than to any other factor the quick horse owed his first development, for Mr. Hale is the inventor of the earliest swinging harness which made the quick horse possible. When Mr. Henry M. Stanley and his wife were in this country, they witnessed an exhibition drill of the Kansas City fire department. The drill so impressed the visitors that an account of it was published in a London journal, and this English article brought an invitation to Mr. Hale to visit England as the representative of the American fire service at the international fire tournament. Mr. Hale and a picked corps went to England, taking with them the remarkably quick horses Joe and Dan, and they became world famous. As the quickest harnessing time of the London fire brigade is 1 minute 171/2 seconds and the Kansas City horses were harnessed in 134 seconds and were out of the engine house in less than 8 seconds, there could be no competition. In Kansas City four fine bays were harnessed to the hook and ladder truck almost as quickly as even Joe and Dan could jump into their harnesses. It was a pretty sight to see these four well kept horses spring to their places at the stroke of the gong and in two or three seconds stand ready to run with the apparatus. Joe was killed by an accident, but Dan, with a new mate, is still in service, and as quick as ever.

The record for quickest time from the engine house to the throwing of water three months. It affected my entire syson the fire is held by a Kansas City company. In this instance the horses were harnessed, a run of 2,194 feet (a little less than half a mile) was made, and water thrown from the hose in the wonderfully brief time of 1 minute 311/2 seconds

Schopenhauer on Women.

Schopenhauer's mother, Joanna, was perpetually at war. She was lively, he was grim. She was a sentimentalist, he detested sentiment. She was devoted to society, to gossip, to the convenances of life. He lived for ideas, and with an almost savage moroseness poured scorn on the round of "at homes" and æsthetic tea parties. Both were selfish and quarrelsome. We may judge, therefore, that Schopenhauer took his notions of women partly from his mother. It goes without saying that these notions were violent in the extreme, yet not without some aspects of truth.

The new woman would rave at this satire on her pretensions, and yet it would do her good to read what Schopenhauer has to say with as much calmness as she can command. Woman is here depicted as emphatically "a lesser ioned German hausfrau. - Self Culture.

Time to Stop.

Among the best stories recorded by a well known angler is one about a Scottish laird who was one day relating to his friends at the dinner table the story of a fine fish he bad caught. "Donald," said he to the servant behind his chair -an old man, but a new servant-"how heavy was the fish I took yesterday?"

Donald neither spoke nor moved. The laird repeated the question. "Weel," replied Donald, "it was twal' pund at breakfast, it had gotten to achteen at dinner time and it was sax and twenty mail in plain wrapper, upon receipt of the dinner time and it was sax and twenty mail in plain wrapper, upon receipt of the dinner time and it was sax and twenty mail in plain wrapper, upon receipt all the dinner time and it was sax and twenty mail in plain wrapper, upon receipt all the dinner time and it was sax and twenty mail in plain wrapper, upon receipt all the dinner time and it was sax and twenty mail in plain wrapper, upon receipt all the dinner time and it was sax and twenty mail in plain wrapper. captain." Then, after a pause, he added, "I've been tellin lees a' my life to please the shooters, but I'll be dashed if I'm going to tell lees noo in my old age to please the fushers."

The Left Wing.

"Is there any portion of the fowl you prefer, major?" asked the hostess bland-

"The left wing, if you please."

"The left wing?"

"Yes," retorted the major, gazing dubiously at the platter. "I believe it is always good military tactics to bring the left wing of a veteran corps into action."-London Fun.

A man may float in salt water without moving his hands or feet if he has the presence of mind to throw his head back and allow his body to sink to the position which it will then naturally

A Turkish turban of the largest size contains 20 yards of the finest and softest muslin.

The story is told of a young married we man, who asked another young married woman how she managed to get along so amicably with her husband. The answer was, "I feed the brute—his stomach with food and his mind with flattery." Even a man will have to admit that this young we man had solved about two-thirds of the ar of making the average man happy. The other third consists of keeping his body as such condition that he will enjoy his food and his mind in such condition that he will be susceptible to flattery. It isn't much use to put tempting food before a man who hasn't an appetite. It doesn't pay to lavish smiles on a man whose nerves are racked and overworked.

The average man pays very little attention to his health, and won't take medicine of his own accord until he is flat on his back A shrewd wife will keep an eye on her has band's welfare in this respect, and when she sees that he is bilious or suffering from indigestion, or is generally out of sorts, will see that he resorts to that most wonderful of all invigorators, Dr. Pierce's Golder Medical Discovery. It is the best of all appetite - sharpeners, blood - makers and flesh-builders. It corrects all disorders of the digestion and makes the liver active and the blood pure. It tones the nerves and cures all cases of nervous exhaustion and prostration. It cures 98 per cent. of as cases of consumption, bronchial, throat and kindred ailments. Medicine dealers sell #

Mrs. Rebecca F. Gardner, of Grafton, York Co. Wa., writes: "I was so sick with dyspepsia that I could not eat anything for over four months. I thought I was going to die. I weighed only so pounds. I took two bottles of the 'Golden Medical Discovery.' I am now as well as ever and weigh 125 pounds."

NOTES GOOD AS GOLD

Even Better, as They Are Much More Convenient.

BAST LIVERPOOL'S SUPERB BANK

The History of Bank Notes In the Days of Long Ago, Demonstrates Very Forcibly the Real Value of Our Present System.
The First National Bank.

The banking system of the United States is simply magnificent in conception and execution, and is the result of the brain work of men of genius—men who have no superiors in the world of finances. This great Republic has, in days gone by, had ripe experience in the attempted solution of the financial problem—experiences which men of brain newer and men of legitimate business circles have no desire to andergo in the present or in the future.

There are men living at the present time who well remember the era of state banks, when it was the next thing to impossible for an individual holding state bank notes to tell what he was worth, as the real value of said notes was constantly changing and fluctuating, and every time a purchaser presented a bill in payment for boots, shoes, dry goods or any commodity, the merchant was compelled to examine his "detector," in order to see how much discount stood against the bill in question and how much change was necessary, while the purchaser, if said change included state notes, also had to resort to said "detector." Broken banks were sa almost daily occurrence, and the guly wise man, if laying up money for a rainy day, clung to nothing but silver and gold, and put the bank notes in the hands of his neighbor and competitor, or even in the hands of an utter stranger, working on the basis of "he was a stranger and I took him IN." "Wild eat money" was the title given to the notes of those days, and the said notes eftentimes caused more excitement and tamult in financial circles than if a panther, catamount or wild cat had unperemoniously entered said business cir-

There are many persons of the present age who seem to take delight in sarsing and abusing the banks and banking or moneyed institutions now in present financial system of the United States, the very best system, for all conserned, that can well be conceived of. Why? The average Yankee reader wants a reason every time. Simply because of the FACT that every dollar of paper money issued by the national banks is worth just 100 cents on the dollar in gold or silver, just as the holder or wner thereof may signify or desire. If you want silver, you can have it for the asking. It you want the "yellow boys," you can have the same at your pleasure. Why? Simply because the United States government, the best in existence, stands back of the money it issues in these notes.

East Liverpool is in the swim in the financial world, and takes just pride in the fact that her national banks hold notes that are as good as the best gold ever excavated from the bowels of Mother Earth and subjected to refining influences; aye better than gold are these notes of Uncle Sam, as they are convenient in the transaction of business

At the head and front of said banking institutions stands the First National bank, tested and tried in the hot crucible of business circles and commercial transactions, and never found wanting in any particular, from the meeting of any obligation, no matter how heavy, to the courtesy which has won for this establishment so many warm and staunch friends.

The First National bank has been, ever and always, run on business printiples, as has been fully demonstrated in the sworn statements made at stated intervals, as the law controlling banking institutions provides and requires. But, while this is financial history, underneath the surface, and never exposed to public view, rests the undeniable fact that this bank has proved a "friend indeed indeed, in an hour of need" to more than one hard pressed business man or house, who would, had the helping hand been withheld, have gone down in the waves of financial destruction. These cases are not for the public eye, or for the "carving of critics," but are merely referred to incidentally. in order to show that banking houses are not soulless or heartless, as many have been taught to believe them.

The First National is now in better condition than at any time in the history of the institution, and stands before the basiness and financial world with a re-

cord that its officials and stockholders may well be proud of.

The bank equipment, in so far as tacilities for the transaction of business are concerned, is simply irreproachable. From massive vaults for valuables and securities, down to superb furnishings, including the privacy of the snug little office devoted to telephonic communication, nothing has been left undone or neglected, and the universal verdict of the public at large is that the First National bank is a credit to East Liverpool, and an institution in which our citizens can take just pride.

SOUND MONEY.

"The most amosing nuptial event I ever officiated at," said good old Squire Hiram Cate to a representative of the Louisville Post, "the marrying magistrate of the Pennyrile," now dead, 'was in the winter of 1871. I was awakened one cold night about midnight by vigorous knocking on my front door. I went to the window and by the light of the moon could see two forms on my front porch. I raised the window and asked what was wanted. A woman of the backwoods type answered in about this language: 'Why, hit's us. Jim an me wants to git bitched.' I hurried down and on opening the door found a down and on opening the door found a poorly clad, finnicky looking man of about 40, led by a deterimned looking woman of perhaps 30. I cold see that | the female was the business part of the rocession and addressed myself to her, asking why they had chosen such a late hour for their 'hitching affair.' This was the reply, in quick, snappy sentences: 'Why, hit's this way. Jim Owens is bin a-sparkin uv of me, I 'low, for fo' yeres, an I got fetched tired uv his mincin wurds, so tuk an ast him tonite, I him, I did, I 'pected him votedly, an ef he wanted me to cum on an le's git j'ined tonite, er I wuz gwine to take Fletch Boggess' boy, Hez, an settle down. Jim 'lowed-he did -he reckined he'd cum, though it wuz a long trip. So I took an fetched him in pap's mill waggin. Didn't I, Jim?' Jim nodded a doleful assent. In answering the questions I put to the groom in the ceremony the brawny better ninetenths gave the bashful spouse about the cue, and she paid me a half dollar, taking the money from Jim's pocketbook. It beat any wedding I ever witnessed, I think."

A Hasty Judgment.

age who seem to take delight in and abusing the banks and ing or moneyed institutions now in ence, and in roundly abusing the int financial system of the United in the take that can well be conceived of.

"I hate intoxicated people," whispered a good looking young lady to a companion on one of the Larimer avenue cars the other evening. A man had boarded the car at Atwood street. He staggered along the aisle and finally managed to get hold of a strap, to which be clung in order to steady himself.

"You're right," answered the one addressed; "the conductors ought to keep them off the cars."

Meanwhile the man was changing his hold on the strap from one hand to the other. He looked down, with his eyes half closed, and when some of the passengers wanted to leave the car he seemed to pay no attention to them, for he did not move out of their way. At the Larimer avenue bridge the car came to a stop. The man seemed to realize that he was at his destination, for while he had not motioned to the conductor he began to go toward the door. The conductor helped him out and after seeing him safely on the sidewalk returned to his car. Turning to a passenger who had been an interested spectator, he said: "Isn't it a pity to be blind? That gentleman lives in the house on the corner, and I take him home every even-

The two young ladies looked at each other in embarrassment, for the conductor had spoken loud enough for everybody in the car to hear him.—Pitts burg Chronicle-Telegraph.

It beat any wedding I ever witnessed, I think."

A Hasty Judgment.

"I hate intoxicated people," whispered a good looking young lady to a companion on one of the Larimer avenue cars the other evening. A man had boarded the car at Atwood street. He staggered along the aisle and finally managed to get hold of a strap, to which he clung in order to steady himself.

"You're right," answered the one addressed; "the conductors ought to keep them off the cars."

Meanwhile the man was changing his hold on the strap from one hand to the other. He looked down, with his eyes half closed, and when some of the passengers wanted to leave the car he seemed to pay no attention to them, for he did not move out of their way. At the Larimer avenue bridge the car came to a stop. The man seemed to realize that he was at his destination, for while he had not motioned to the conductor he began to go toward the door. The conductor helped him out and after seeing him safely on the sidewalk returned to his car. Turning to a passenger who had been an interested spectator, he said: "Isn't it a pity to be blind? That gentleman lives in the house on the corner, and I take him home every even-

The two young ladies looked at each other in embarrassment, for the conductor had spoken loud enough for everybody in the car to hear him.—Pitts burg Chronicle-Telegraph.

pont Lay It.

"I have no place to lay my head," she sobbed.

Her good fairy at once appeared.
"Be careful, then," urged the latter,
waving her wand, "that you don't lose

Gliding to the front of the stage, the enchantress let it be understood that there would be a calorific period in the ancient municipality that evening.—

THE police should keep an eye on wheelmen. Perhaps a little vigilance will prevent an accident.

THERE is still ample time for the legislature to enact a good road law, but the inclination required does not seem to be a part of the average legislator.

THE Democrats are after Allen O. Myers, and when they get him that versatile gentleman will quietly drop out of Ohio politics for another period of

THE Ohio house has done some very foolish things since it began business in January, but it certainly showed its good sense when it endorsed the Cuban policy of President McKinley.

It is extremely gratifying to know that the war scare has not driven the immigration restriction measure from the minds of its friends. The promise is given that it will soon appear in the house for final action, and it is believed a sufficient number of votes can be mustered to pass it with a good majority.

Spain hates the United States, and as long as a Spaniard can recall the events of the past three years she will continue to hate this country, but now that Sagasta and his friends realize how terribly earnest Uncle Sam has suddenly become, they will sleep on the proposition a good many times before they declare for war. Spain never did relish conflict when the other fellow was prepared for attack.

If the Republican party does not win the April election it will have no one to blame but itself. The people are anxious to vote the Republican ticket because the principles of the party represent to them the best of government, but they will not support candidates who pay no attention to those principles but seem ever anxious to trample them under the dust. East Liverpool is determined to have good government.

THE next important matter is the report of the board at present inquiring illness. Consumption was the cause. into the causes which led to the destruction of the Maine. Until that decision is announced the country can do nothing but wait, while the government continues its preparations for war. In spite heartfelt sympathy of a large circle of of the closing of the Lee incident and a number of other incidents, it must not be forgotten that the responsibility for the loss of the battleship is still the real issue.

As to Whether Deacon Was Willing to Pay

BELL LEFT THE STATE

All the Evidence In the Case Is In and the Attorneys For Each Side Were Allowed an Hour and a Half For Argument. Some Interesting Points.

LISBON, March 10.-[Special]-The trial of Joseph Deacon brought out some interesting testimony yesterday afternoon and last evening. A night session of court was held, and a large number of witnesses were examined.

James Skelton said he lived in the house occupied by the Deacons. Deacon had told him Trinle had swindled him out of some money and the pottery would not run over a year at most for flint bin looked like cobalt his firm had. want of capital.

Michael Eck said Deacon had told him the pottery would not run long, the company was too much in debt.

Porter Bell, the watchman, testified that he had been employed by the company last September to watch the bins. On the night of Oct. 25 he was on duty when soon after 8 o'clock he saw two persons, a man and woman, coming up the track. When they had passed the might have been taken and he not fint bin the man crossed the wire fence and emptied a basket filled with some material into the bin. "Just then I came out of hiding, and he struck me der the 14 tons of flint valueless. over the head with the basket. We clinched and fell. I called for help, and Deacon called for Lucy'to come and help him. Several workmen came, and the of Deacon." He watched the bin the made when Deacon leaned over the cents. Bell had told Stewart that part remainder of the night, and the next morning turned it over to Owen and Trenle as it was when Deacon was arrested. Then he went with James Ward to the point where Deacon had crossed, and found the cover of the basket.

James Ward, a workman at the pottery, corroborated the last statement, and said he saw tracks leading from the fence to the flint bin.

John Bell lives within 200 yards of the pottery, and the night in question heard cries for help. Going to the spot he saw Deacon, a number of other persons and

teresting witnesses at the trial. Once Deacon asked him how the ware at the pottery was coming out, and five weeks after the arrest Deacon talked with him again, asking him to see Porter Bell and ask him if he would leave Ohio for \$500. Deacon also said Trenle had done him dirt, and the pottery ought to be blown up with dynamite.

Jacob Shenkel said Deacon had remarked to him that ne had gotten into a "devil of a mess." He has known Deacon 40 years, and said he had borne a good reputation.

John Caldwell testified that Deacon while in jail asked him to go on his

John Bennett was working in the East End pottery the night of the trouble. and hearing cries for help went to the place. There he found Bell and Deacon on the ground near the bin. Bell went to the flint mill to summon the police.

Emory Luthringer, the regular watchman at the plant, heard a call for help. and upon going to the spot saw Deacon and Bell on the ground. The latter had a revolver.

Perry Osterhouse, a clerk in the store where Mrs. Deacon dealt, said she ordered two baskets of grapes the Saturday before the arrest, and coming in on Monday said they had not been delivered. A basket was then given her. The basket found at the bin bore the same stamp as that on the basket he gave her.

Harry Pippin's testimony was unimthat she saw Mrs. Deacon on a street car Oct. 25, and she then had a basket.

M. E. Golding gave the first of the down expert testimony by saying that cobalt placed on ground flint would destroy the to come back into the company, saving flint. It would be worth nothing, they would put up \$1000 forfeit that Joshua Pool made a similar statement, they would never go back on him. adding that he would take no chances in removing the cobalt, but would night of Oct. 25. He heard cries for throw it all away. William Cartwright help and ran to the place. He saw Bell declared that a peck of cobalt, soap and holding Deacon down, but he saw no salt scattered over 14 tons of flint would women about the track render the flint unfit for use.

Soap scattered over the flint in the bin buttal. She lived in the house with the Oct. 26. DEACON'S STORY.

He Denied That He Had a Basket the Night In Question.

LISBON, March 10.—[Special]—Court opened this morning at 8:30 o'clock, Walter B. Hill being the first witness for the defense, the regular order having been changed in order to allow witnesses to return home last night.

Mr. Hill visited the pottery Oct. 27, and saw the adulterated fiint. He was also there the next day, but the flint had been removed from the bin. He went to the dump, and thought about 30 wheelbarrows full had been placed there.

Joseph Deacon was the last witness. He has worked in the potteries since he was 11 years old, and helped to organize the East End Pottery company, having 25 shares of the Later he sold his stock and took a second mortgage for \$2,500. About two years ago Owen and Trenle purchased the plant and he received \$1,500 in cash and two notes of \$500 each. Trenle wanted him to join the firm, and to Oct. 25 he never had any trouble with them. That evening he vene at 7 o'clock. Mr. Harker was again left home a few minutes after 8 o'clock, and started for the flint mill to see John Arnold. As he was walking by the flint bins, Porter Bell jumped out and threw him down, holding him there until other men appeared. Then the police were called, and he was taken to W. E. Vodrey stated that the mixture jail. He declared that he and his wife did not go walking that evening. He had a talk with Stewart, but Manager E. J. Owen was recalled, denied that he offered to give Bell On the other hand, he said Stewart told him Bell would leave for \$50, but he

Human Magnets.

Experiments made recently by scientific men in France, says the London Standard, have developed a somewhat curious and unexpected fact-namely, that certain persons possess a magnetic polarity-that is, they are found to act after the manner of magnets, having, in fact, north and south poles. In such a case the individual, on being completely undressed and placed near a sensitive galvanometer, will, when turned on a vertical axis, cause a deflection, first in one direction and then in the opposite, just as a magnet will do. It is not assumed that all persons possess this polarity, but in the case of Professor Murani, an Italian, upon whom the experiment was tried, the phenomenon was unmistakably exhibited, it being found that his breast corresponded to a north pole and his back to a south pole.

TWO DIFFERENT TALES

As to Whether Deacon Was Willing to Pay

BELL LEFT THE STATE

All the Evidence In the Case Is In and the Attorneys For Each Side Were Allowed an Hour and a Half For Argument. Some Interesting Points.

LISBON, March 10.-[Special]-The trial of Joseph Deacon brought out some interesting testimony yesterday afternoon and last evening. A night session of court was held, and a large number of witnesses were examined.

James Skelton said he lived in the house occupied by the Deacons. Deacon had told him Trinle had swindled him out of some money and the pottery want of capital.

Michael Eck said Deacon had told him the pottery would not run long, the company was too much in debt.

Porter Bell, the watchman, testified that he had been employed by the company last September to watch the bins. On the night of Oct. 25 he was on duty when soon after 8 o'clock he saw two persons, a man and woman, comimg up the track. When they had passed the flint bin the man crossed the wire fence and emptied a basket filled with some came out of hiding, and he struck me der the 14 tons of flint valueless. over the head with the basket. We clinched and fell. I called for help, and Deacon called for Lucy'to come and help him. Several workmen came, and the police were summoned who took charge of Deacon." He watched the bin the remainder of the night, and the next morning turned it over to Owen and Trenle as it was when Deacon was arrested. Then he went with James Ward to the point where Deacon had crossed. and found the cover of the basket.

James Ward, a workman at the pottery, corroborated the last statement. and said he saw tracks leading from the fence to the flint bin.

John Bell lives within 200 yards of the pottery, and the night in question heard cries for help. Going to the spot he saw Deacon, a number of other persons and the basket.

John Stewart was one of the most interesting witnesses at the trial. Once company. Deacon asked him how the ware at the again, asking him to see Porter Bell and ask him if he would leave Ohio for \$500. Deacon also said Trenle had done him dirt, and the pottery ought to be blown up with dynamite.

Jacob Shenkel said Deacon had rea "devil of a mess." He has known Deacon 40 years, and said he had borne a good reputation.

John Bennett was working in the East End pottery the night of the trouble. and hearing cries for help went to the place. There he found Bell and Deacon on the ground near the bin. Bell went to the flint mill to summon the police.

Emory Luthringer, the regular watchman at the plant, heard a call for help. and upon going to the spot saw Deacon and Bell on the ground. The latter had

Perry Osterhouse, a clerk in the store where Mrs. Deacon dealt, said she ordered two baskets of grapes the Saturday before the arrest, and coming in on Monday said they had not been delivered. A basket was then given her. The basket found at the bin bore the same stamp as that on the basket he gave her

Harry Pippin's testimony was unimportant, but Mrs. Walter Young testified o'clock and his mother was in the house that she saw Mrs. Deacon on a street car all evening. Soon after they went to Oct. 25, and she then had a basket.

M. E. Golding gave the first of the down expert testimony by saving that cobalt placed on ground flint would destroy the to come back into the company, saving flint. It would be worth nothing. they would put up \$1000 forfeit that was a Pittsburg visitor today. Joshua Pool made a similar statement, they would never go back on him. adding that he would take no chances in removing the cobalt, but would night of Oct. 25. He heard cries for throw it all away. William Cartwright help and ran to the place. He saw Bell declared that a peck of cobalt, soap and holding Deacon down, but he saw no salt scattered over 14 tons of flint would women about the track render the flint unfit for use.

H. A. McNicol saw cobalt, salt and soap scattered over the flint in the bin Oct. 26. He took samples and they had been calcined. The color was very blue. He thought the mixture would ruin ground flint. Mr. Ferguson thought likewise, and John W. Vodrey gave the night he was arrated. Deacon said Same opinion, adding that he had known said he was walking with his wife when Deacon all his life and to this time h Bell jumped out and caught him. had had a good reputation.

H. N. Harker testified that the Harker rest, and Deacon told him it was all a day.

Pottery company kept its cobalt in an outbuilding where a person so disposed could have access to it. That in the would not run over a year at most for flint bin looked like cobalt his firm had. Ware made from flint with such a mixture as cobalt, salt and soap in it would not be marketable.

> That ended the afternoon session, but Judge Smith decided court should convene at 7 o'clock. Mr. Harker was again called, and stated that they usually kept and started for the flint mill to see John 60 pounds of cobalt on hand, and had Arnold. As he was walking by the not missed any about the time of the East End trouble, but small amounts threw him down, holding him there might have been taken and he not known it.

The City Is Not as Filthy as Usual, but the Health Authorities Are Determined to Have It Thoroughly Cleaned-Alleys Will Receive Attention.

House cleaning time has come for the city, and the health authorities are determined that their edict shall be obeyed in every part of town.

The time really begins next Tuesday, but Officer Burgess has already commenced to notify the people. A great many notices have been mailed, and there will be many more before the week is out. The officer says the city is much cleaner than usual at this season, but it is the purpose of the authorities to see that the cleaning is general. Particular attention will be paid to alleys and the accumulated filth of the winter will be removed as rapidly as possible. Every back yard in the city will also be well cleaned.

SHUT THE BOOK.

Mrs. Feistler Would Not Let Her Husband Read the Law.

Herman Feistler was arraigned this morning before Squire Hill for not sending his child to school. It was necessary for Constable Lyon to go after him as he refused to appear. When Squire Hill offered him the law so he could enter an intelligent plea, his wife shut the book and would not let him read the law. He promptly plead not guilty and the hearing was set for Monday.

It is probable a plea will be entered that the child is beyond control and the case will be dismissed, and the truant officer will commence action against the

Surprised Their Friends.

A very pleasant surprise party was held last evening at the bome of Mrs. J. N. Logan, Sixth street, in honor of her birthday. The evening was spent in music and games, and a delicious lunch was served. Mrs. J. T. McBrier, of Galyly, Pa., a twin sister of the hostess, was present. The other out-of-town in a secluded place, and, knocking on guests were Mrs. W. J. Owens, Miss the door, was bidden by the doctor to Edna Owens, East Palestine; Arthur McBrier, Galyly, Pa.

A number of friends last evening called at the home of Willard Morris to remind him it was his birthday, and spent a very delightful evening.

A surprise party was held last evening at the home of Miss Flora Albright. A large number of guests were present and spent a delightful evening.

On the River.

The river fell only an inch during the night and this morning, and the marks at the wharf at noon today registered 6.4 feet.

The Urania and Ben Hur are due down tonight, and the Lorena and Bedford are the only packets that will come up this evening.

The boats down tonight will have good trips, and several passengers will go out on them.

Several hundred hoop poles were put off by the Urania vesterday afternoon. The Virginia is due up tomorrow, and is expected to arrive promptly, as it is making exceptionally fast time.

Sohmer Piano.

Smith & Phillips.

And Still They Come.

Two more movings were handled at the freight depot yesterday afternoon van." This, of course, was the way he and this morning. The record for the week is seven.

The effects of George Sebring were received from East Palestine, and those of James Wooliscraft came from Kokomo,

Enforcing the Bicycle Law.

The police yesterday afternoon kept a close watch on all bicycle riders, and as a result several riders were compelled to slacken their speed in Fifth street.

One officer said he did not intend to let any fast riders pass him while the bicycle ordinance is in effect.

stone work of the John S. Goodwin start Monday.

HOW HE SAVED THE DAY FOR HIM-SELF AND HIS LAWYER.

Thoughtlessly Signed an Affidavit With a Name He Swore Was Not His Own-But He Won the Judge and His Point by His Explanation.

My first case came at Florence, Ala., a few months after I was licensed, writes Attorney B. M. Jackson. The sheriff there, Captain W. T. White, now dead, a gallant Confederate soldier and one of nature's noblemen, met me on the street and told me there was a man confined in the county jail who wished to see me.

I was then 21 years old, but would readily have passed for 17. The client's name was Patrick Donevan, but he was commonly called Patsy Donevan. Going to the jail, I found a man from 30 to 35 years old, an intelligent, nice looking, devil may care Irishman. When I entered, he greeted me with "Good evening, miss." Pretending not to have heard him address me as "miss" and assuming much dignity, I told him I was the lawyer whom the sheriff had promised to send him. For answer he exclaimed, "Well, I'll be d--d," and burst out laughing-laughing uproariously. I was irritated to a degree by this reception. "I beg pardon, judge, it's a go. You do look pretty young, but Tom (the sheriff) says you are a daisy. Get me out of here, and my folks, who've got plenty, will pay you well for your trouble."

He told me his story. He was a skilled mechanic from Keokuk, Ia., and had been employed by the government in constructing a lock on the Mussel Shoals canal, near Florence. He had shot the physician in charge of those works. This physician was a brother of the United States engineer in control of the canal construction, and it was evident that the prosecution would be bitter, sparing no pains or expense to secure a conviction, entailing a long penitentiary sentence. The doctor and my client were both men of reckless courage and overbearing temper, both sometimes looked on the wine when it was red, and both, I inferred, were striving for the favor of the same woman. A clash between them soon came. They had a savage quarrel at their boarding house at dinner. The doctor being armed and my client unarmed, the latter had to submit to unlimited abuse and would have been shot but for the interference of several men who were present. Soon after nightfall of the same day my client went to the doctor's office and sleeping room, about a mile distant and come in. Entering, he found the doctor putting on a shirt, and thus for the moment disabled, and, remarking, "You had the drop on me this morning, but I've got it on you now," fired, striking the doctor in the neck and inflicting a dangerous but not fatal wound.

The case soon came on for trial. While the defendant's version of the occurrence as he had given it to me was very different from the one in the foregoing, yet it was so improbable in itself and so inconsistent with the attendant circumstances that it looked as if a sentence of ten years was inevitable if the case was then tried. To gain a postponement an objection was interposed to the competency of the court on the ground that he was related by affinity to the prosecutor. This failed. Next an earnest effort was made for a continuance. The state fought this aggressively, thus giving warning of what was to come, and it, too, failed.

In sheer desperation I then whispered to my client, "Your real name is Patrick, not Patsy, isn't it?" The indictment named him Patsy Donevan. Then, moving to quash the indictment for the misnomer, I wrote out the defendant's affidavit in support. The affidavit stated that the defendant's name was Patrick and that he was commonly known and called by this name and not by the name of Patsy Donevan. He took the affidavit and read, or seemed to read, it carefully and, going to the clerk's desk, swore to it and signed it "Patsy Doneusually signed his name, but he never reflected that to sign it Patsy this time was to afford the strongest evidence of

the falsity of the affidavit. Arguing the case without looking at the affidavit, I didn't see how he had signed it, but the state attorney had noticed the signature and in his reply called the court's attention to it. This disclosure raised a storm of laughter and jeering in the courtroom. I was confounded and at the end of my resources. Not so was Patsy. Realizing his peril, that the slip was his own and that he alone could retrieve it, he spoke out, not a whit abashed: "I signed it Patsy out of pure respect for your honor. It's not for me to give the lie to your honor's court papers. Your honor's court paper says I'm Patsy, and I'll sign it Patsy until your honor gives me leave

The court sustained the motion from pure admiration for Patsy. We now had time to look about us. A few months later the case was tried, the jury failing to agree. The bail bond, The consists the excavation and which had be fixed at a bigh figure, was then reduced to a reasonable sum. Porcelain company's plant in Wells- He gave the bond, saying he had "lost ville will be let tomorrow. Work will by a 16 se," but he never returned to stand another trial, although his bonds-

men were promptly reimbursed, and the writer was generously remembered, receiving, as I now remember, \$300. I have often been curious to know what became of the game, rollicking, imperturbable Patsy. - Memphis Commercial

Not Reached an Agreement.

COLUMBUS, March 10.—The operators and miners have not yet reached an agreement on the day labor scale. The miners ask \$1.77½ a day, and the operators have offered \$1.75, 3 cents more than their original offer. It is believed a compromise will be made on \$1.75.

The Type In the Oxford Bible.

Statistics have a fascination for many people, who will be interested in learning that there are 773,746 words in the authorized version of the Bible and 3,566,482 letters, including Æ's. These figures, says The Periodical, the monthly journal of announcements issued by the Clarendon press, relate to a text Bible and are independent of verse figures and figures (if used) in chapter headings. To estimate the total number of separate bits or pieces of metal which together make up the types of an Oxford reference Bible there may then be added fully 1,100,000 letters, figures, points, spaces, etc., in the text and 900,000 in the marginal notes, making a total of 5,566,482 pieces in all.

Chocolate.

To those who study the niceties of deiail in the preparation of even a simple dish it may be suggested that chocolate used as a drink is much improved if blended several hours beforehand. It is better even to break the lumps of unsweetened chocolate into an earthen bowl the night before, adding cold water and covering closely. In this way the flavor of the chocolate is best ex-Iracted. - New York Post.

Velvet the Style.

Lady Violet Greville, whose tips on the fashions are always accepted as gospel, writes from Paris, saying that velvet will reign supreme this spring in the fashionable world. She says, "Velvet in every style, shape and colorcornflower blue, sapphire, silver gray shot with gold and a host of other startling shades-will be worn."

AGAINST REV. NORRIS

Pittsburg Presbytery Expected to Take Action.

NO TRIAL WILL BE NECESSARY

According to the New Book of Discipline of the Presbyterian Church Only a Motion Is Needed to Drop His Name From the Roll.

It now appears that the Pittsburg presbytery will take up the case of Rev. J. H. Norris, who last fall created a great commotion in the Presbyterian church by embracing the doctrine of holiness.

"Members of presbytery have been receiving letters from Indiana county, complaining that Mr. Norris had been allowed to come among them and carry on his 'holiness meetings,' still posing as a Presbyterian minister in good and regular standing," says the Dispatch of this morning. "The presbytery here has hesitated to handle him, as they dreaded a trial, but it is now settled that a formal trial is altogether unnecessary.

"Mr. Norris has practically cut loose from the Presbyterian church. He has established a church of his own, 'the First Pentecostal Church of Mt. Washington,' and thus declared himself 'independent.' In these circumstances the ecclesiastical lawyers declare that all that is necessary is a 'whereas' and a simple motion to drop Mr. Norris' name from the roll of the presbytery. This action is made lawful under the new Presbyterian book of discipline. Here is the

"In the new book of discipline, chapter 7 'of cases without process,' the law for such cases is given in section 53: 'If a minister, not otherwise chargeable with an offense, renounces the jurisdiction of this church, his abandoning the ministry or becoming independent, or joining another denomination not deemed heretical, without a regular dismission, the presbytery shall take no other action than to record the fact and to erase his name from the roll. If charges are pending against him, he may be tried thereon. If it appears that he has joined another denomination deemed heretical, he may be suspended, deposed or excommunicated."

The presbytery will meet April 5 at the First church in Pittsburg.

HOW LACES ARE NAMED.

Design of Pattern and Locality of Manufacture Make the Distinction.

Orlena L. Shackleford, in "Certuries of Lace," in The Woman's Home Companion, gives these interesting facts on lace manufacture.

"The nomenclature of lace is decided by certain peculiarities of pattern, mesh or stitches that belong to certain localities, and it is retained even when the localities have long ceased to produce their distinctive fabrications. Valenciennes has not for many years wrought the laces that bear its name, their mannfacture having long since been transferred to Ypres, Belgium, while the chantilly laces are all made at Bayeux.

"The finest French laces are made in Normandy, the cheaper ones come from the Auvergne, which was the first French province to produce pillow lace. Bayeux, with her tributary surroundings, is the largest and best producer of black laces. Her chantilly is par excellence the finest ever made. Caen is also a center for black laces. Normandy produces good black and white blonds. Guipures are made in the Auvergne, but the finest come from the Vosges. Mirecourtfurnishes fine point and pillow lace. Brussels furnishes most of the Belgian needle points, though east Flanders, Brabant and Hainault now supply large quantities. The old laces for which Binche, Bruges and Flanders were once so celebrated are no longer the mode, though still much prized by connoisseurs. This is also true of malines, or mechlin, lace and valenciennes, though and different parts of Flanders. Lille and Valenciennes formerly belonged to the Netherlands, which accounts for their early proficiency in lacemaking.

"Flemish guipures are noted for their excellence. The Belgian and French laces are the finest, in point of fabrication, in the world. Paris is to a large extent an emporium for Belgian laces. She is the birthplace of fashions and novelties and dictates lace designs, keeping alive emulation and rewarding merit through her Society of Decorative Arts. To France must be accorded the palm for black laces, while Belgium may claim it for the vaporous fineness of her points, nothing equaling in ethereal delicacy her famous point de gaze."

Nervous Prostration.

Dr. J. Curtis Webb, an eminent English physician, recently lectured on this subject. The lecturer said that hysteria was a symptom of nerve exhaustion and was a state in which the ideas controlled the body and produced morbid changes in its functions. If allowed to go on uninterrupted, nervous exhaustion and breakdown followed. The seeds of this really terrible disease were in 99 cases out of 100 sown and watered during the period of education and training of girls at and after a critical period of life. Such cases were more frequent since the introduction of the system of higher education of women, for the advocates of this made the great mistake of assuming that there was no real difference between girls and boys between the ages of 14 and 21. He mentioned the frequent occurrence of cases of anæma and breakdown among girls and attributed this to excessive mental work and the lack of healthy exercise.

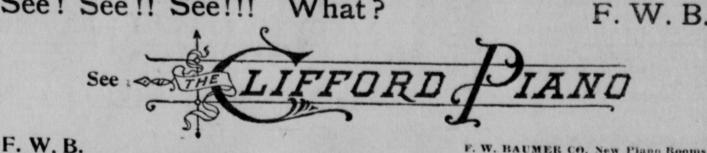

He advocated golf, cycling, lawn tennis and other games as a preventive and corrective and insisted upon the necessity for regular indulgence in physical exercise. It was not work which hurt, but perseverance in work after nature had held out her danger signals in the shape of constant lassitude, loss of appetite and irregularity of functions. Nervous exhaustion sometimes occurred as a result of excessive physical exercise, and among middle aged ladies as a result of worry. The remedy in the latter case was to live easier and according to rule. The complaint was also met with in young children and was in these cases generally due to the forcing of mental faculties or constant scolding and nagging.

An Estimate of Henry George.

Henry George had all the popular gifts of the American orator and journalist, with something more. Sincerity rang out of every utterance. Sparing in book knowledge, he had hammered out his thoughts upon the forge of personal experience and showed them hot from the bammer, rude and unfinished in strong talk on the good to be received form. For this very reason "Progress from keeping promises, after which and Poverty," a stumbling block to remany persons in the room made brief sponsible politicians, to the economic professor foolishness, struck the common mind of the thinking people with convincing and dramatic force. The influence of this first book of serious economic import which ever reached the outer circle of the English reading publie is not to be slighted. It is a matter of deep significance that such a book should have reached a circulation of far upward of 100,000 copies. Upon the pressure of the early popularity of his book Henry George threw the weight of his present personality, and his great gifts as orator and debater secured his influence and widely advertised his doctrines at a time particularly favorable to their reception .- Fortnightly Re-

Glasgow, Manchester and Teming ham are still the foremost industrial centers of Europe.

PORTUGUESE PIRATE

HOW BARTHOLEMY CAPTURED A HUGE SPANISH MERCHANTMAN

His First Attack Failed-The Little Pirate Then Lay Within short Range, and With Rifles the Spanish Force Was Reduced and Finally Conquered.

A series of sketches by Frank R. Stockton on "The Buccaneers of Our Coast" is one of the features of St. Nicholas. Mr. Stockton tells of the adventures of Bartholemy Portuguez, who, with a small crew in a small vessel, captured a huge Spanish merchantman in the Caribbean sea. Mr. Stockton says: The little pirate sailed boldly toward the big Spaniard, and the latter vessel, utterly astonished at the audacity of this attack-for the pirates' flag come near enough to see and understand the size and power of the vessel they had thought of attacking, they did not, as might have been expected, put about and sail away at the best of their vessel's speed, but they kept straight on their course, as if they were about to fall upon a great, unwieldy merchantman manned by common sailors.

Perceiving the foolha diness of the little vessel, the Spanish commander determined to give it a lesson which would teach its captain to understand better the relative power of great vessels and little ones, so as soon as the pirates' vessel was near enough he ordered a broadside fired upon it. The Spanish ship had a great many people on board. It had a crew of 70 men, and besides these there were some passengers and regular marines, and, knowing that the captain had determined to fire upon the approaching vessel everybody had gathered on deck to see the little pirate ship go down.

But the ten great cannon balls which were shot out at Bartholemy's little craft all missed their aim, and before the guns could be reloaded or the great ship be got around so as to deliver her other broadside the pirate vessel was alongside of her. Bartholemy had fired none of his cannon. Such guns were useless against so huge a foe. What he was after was a hand to hand combat on the deck of the Spanish ship.

The pirates were all ready for hot work. They had thrown aside their coats and shirts, as if each of them were going into a prizefight, and with their cutlasses in their hands and their pistols and knives in their belts they scrambled like monkeys up the sides of the great ship. But Spaniards are brave men and good fighters—there were more than twice as many of them as there were of the pirates-and it was not long before the latter found out that they could not capture that vessel by boarding it. So over the side they tum bled as fast as they could go, leaving some of their number dead and wounded behind them. They jumped into their own vessel, and then they put off to a short distance to take breath and get ready for a different kind of fight. The triumphant Spaniards now prepared to get rid of this boatload of half naked wild beasts, which they could easily do if they took better aim with their cannon than they had done before.

But to their amazement they soon found that they could do nothing with the guns, nor were they able to work their ship so as to get it into position for effectual shots. Bartholemy and his men laid aside their cutlasses and their pistols and took up muskets, with which they were well provided. Their vessel lay within very short range of the Spanish ship, and whenever a man could be seen through the portholes or showed himself in the rigging or anywhere else where it was necessary to go in order to work the ship he made himself a target for the good aim of the pirates. The pirate vessel could move about as it pleased, for it required but a few men to manage it, and so it kept out of the way of the Spanish guns, and its best marksmen, crouching close to the deck, fired and fired whenever a Spanish head was to be seen.

For five long hours this unequal contest was kept up. It might have reminded one of a man with a slender rod and a long, delicate line who had hooked a big salmon. The man could not pull in the salmon, but, on the other hand, the salmon could not hurt the man, and in the course of time the big fish would be tired out and the man would get out his landing net and scoop him in

Now, Bartholemy thought he could scoop in the Spanish vessel. So many of the energy and that the two crews would be more nearly equal. So he boldly ran his vessel alongside the

big ship and again boarded ner. inen there was another great fight on the decks. The Spaniards had ceased to be triumphant, but they had become desperate, and in the furious combat ten of the pirates were killed and four wounded. But the Spaniards fared worse than that. More than half of the men who had not been shot by the pirates went down before their cutlasses and pistols, and it was not long before Bartholemy had captured the great Spanish ship.

It was a fearful and a costly victory he had gained. A great part of his own men were lying dead or helpless on the deck, and of the Spaniards only 40 were left alive, and these, it appears from the accounts, must have been nearly all wounded or disabled.

"Flemish guipares are noted for their excellence. The Belgian and French laces are the finest, in point of fabrication, in the world. Paris is to a large extent an emporium for Belgian laces. She is the birthplace of fashions and novelties and dictates lace designs, keeping alive emulation and rewarding merit through her Society of Decorative Arts. To France must be accorded the palm for black laces, while Belgium may claim it for the vaporous fineness of her points, nothing equaling in ethereal delicacy her famous point de gaze."

Nervous Prostration.

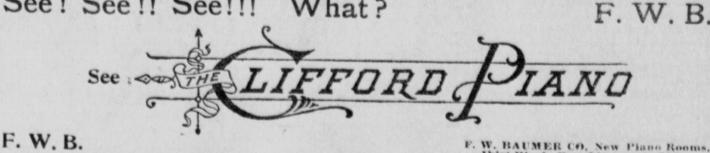

Dr. J. Curtis Webb, an eminent English physician, recently lectured on this subject. The lecturer said that hysteria was a symptom of nerve exhaustion and was a state in which the ideas controlled the body and produced morbid changes in its functions. If allowed to go on uninterrupted, nervous exhaustion and breakdown followed. The seeds of this really terrible disease were in 99 cases out of 100 sown and watered during the period of education and training of girls at and after a critical period of Yesterday a team driven by Richard life. Such cases were more frequent since the introduction of the system of higher education of women, for the advocates of this made the great mistake of assuming that there was no real difference between girls and boys between the ages of 14 and 21. He mentioned the frequent occurrence of cases of anæma and breakdown among girls and attributed this to excessive mental work

and the lack of healthy exercise. He advocated golf, cycling, lawn tennis and other games as a preventive and corrective and insisted upon the necessity for regular indulgence in physical exercise. It was not work which hurt, but perseverance in work after nature had held out her danger signals in the shape of constant lassitude, loss of appetite and irregularity of functions. Nervous exhaustion sometimes occurred as a result of excessive physical exercise, and among middle aged ladies as a result of worry. The remedy in the latter case was to live easier and according to rule. The complaint was also met with in young children and was in these cases generally due to the forcing of mental faculties or constant scolding and nagging.

An Estimate of Henry George. Henry George had all the popular gifts of the American orator and journalist, with something more. Sincerity rang out of every utterance. Sparing in book knowledge, he had hammered out his thoughts upon the forge of personal experience and showed them hot from the hammer, rude and unfinished in strong talk on the good to be received form. For this very reason "Progress from keeping promises. after which and Poverty," a stumbling block to responsible politicians, to the economic professor foolishness, struck the common mind of the thinking people with convincing and dramatic force. The influence of this first book of serious economic import which ever reached the outer circle of the English reading publie is not to be slighted. It is a matter of deep significance that such a book should have reached a circulation of far upward of 100,000 copies. Upon the pressure of the early popularity of his book Henry George threw the weight of his present personality, and his great gifts as orator and debater secured his influence and widely advertised his doctrines at a time particularly favorable to their reception .- Fortnightly Re-

> Glasgow, Manchester and Staming ham are still the foremost industrial centers of Europe.

PORTUGUESE PIRATE

HOW BARTHOLEMY CAPTURED A HUGE SPANISH MERCHANTMAN.

His First Attack Failed-The Little Pirate Then Lay Within short Range, and With Rifles the Spanish Force Was Reduced and Finally Conquered.

A series of sketches by Frank R. Stockton on "The Buccaneers of Our Coast" is one of the features of St. Nicholas. Mr. Stockton tells of the adventures of Battholemy Portuguez, who, with a small crew in a small vessel, captured a huge Spanish merchantman in the Caribbean sea. Mr. Stockton says: The little pirate sailed boldly toward the big Spaniard, and the latter vessel, utterly astonished at the audacmechlin, lace and valenciennes, though | ity of this attack-for the pirates' flag was flying-lay to, head to the wind, makes a round mesh valenciennes, not so and waited, the gunners standing by their cannon. When the pirates had come near enough to see and understand the size and power of the vessel they had thought of attacking, they did not, as might have been expected, put about and sail away at the best of their vessel's speed, but they kept straight on their course, as if they were about to fall upon a great, unwieldy merchantman manned by common sailors.

Perceiving the foolha diness of the little vessel, the Spanish commander determined to give it a lesson which would teach its captain to understand better the relative power of great vessels and little ones, so as soon as the pirates' vessel was near enough he ordered a broadside fired upon it. The Spanish ship had a great many people on board. It had a crew of 70 men, and besides these there were some passengers and regular marines, and, knowing that the captain had determined to fire upon the approaching vessel everybody had gathered on deck to see the little pirate ship go down.

But the ten great cannon balls which were shot out at Bartholemy's little craft all missed their aim, and before the guns could be reloaded or the great ship be got around so as to deliver her other broadside the pirate vessel was alongside of her. Bartholemy had fired none of his cannon. Such guns were useless against so huge a foe. What he was after was a hand to hand combat on the deck of the Spanish ship.

work. They had thrown aside their apply at 291 Lincoln avenue. coats and shirts, as if each of them were going into a prizefight, and with their cutlasses in their hands and their pistols and knives in their belts they scrambled like monkeys up the sides of the great ship. But Spaniards are brave men and good fighters-there were more than twice as many of them as there were of the pirates-and it was not long before the latter found out that they could not capture that vessel by boarding it. So over the side they tum bled as fast as they could go, leaving some of their number dead and wounded behind them. They jumped into their own vessel, and then they put off to a Incorporated under the laws of Ohio under short distance to take breath and get ready for a different kind of fight. The triumphant Spaniards now prepared to get rid of this boatload of half naked wild beasts, which they could easily do if they took better aim with their cannon than they had done before.

But to their amazement they soon found that they could do nothing with the guns, nor were they able to work their ship so as to get it into position for effectual shots. Bartholemy and his men laid aside their cutlasses and their pistols and took up muskets, with which they were well provided. Their vessel lay within very short range of the Spanish ship, and whenever a man could be seen through the portholes or showed himself in the rigging or anywhere else where it was necessary to go in order to work the ship he made himself a target for the good aim of the pirates. The pirate vessel could move about as it pleased, for it required but a few men to manage it, and so it kept out of the way of the Spanish gons, and its best marksmen, crouching close to the deck, fired and fired whenever a Spanish head was to be seen.

For five long hours this unequal contest was kept up. It might have reminded one of a man with a slender rod and a long, delicate line who had hooked a big salmon. The man could not pull in the salmon, but, on the other hand, the salmon could not hurt the man, and in the course of time the big fish would be tired out and the man would get out his landing net and scoop

Now, Bartholemy thought he could scoop in the Spanish vessel. So many of hence post an chot that the two crews would be more nearly equal. So he boldly ran his vessel alongside the

big ship and again boarded ner. inen there was another great fight on the decks. The Spaniards had ceased to be triumphant, but they had become desperate, and in the furious combat ten of the pirates were killed and four wounded. But the Spaniards fared worse than that. More than half of the men who had not been shot by the pirates went down before their cutlasses and pistols, and it was not long before Bartholemy had captured the great Spanish ship.

It was a fearful and a costly victory be had gained. A great part of his own men were lying dead or helpless on the deck, and of the Spaniards only 40 were left alive, and these, it appears from the accounts, must have been nearly al' wounded or disabled.

WANTED

WANTED-AGENTS TO SELL MURAT W Halstead's Great Guba book; all about Cuba, Spain and war; great excitement; everyone buys it; one agent sold 87 in one day; another made \$13 in one honr, 600 pages; magnificent illustrations; photographs, etc., low price; we guarantee the most liberal terms; freight paid; 20 days credit; outfit free; send 6 two-cent stamps to pay postage The Bible House, 324 Dearborn street, Chicago.
